## Studio Tommy Lai

Hong Kong-based multidisciplinary designer Tommy Lai established his practice in 2019 as a vehicle to further develop his furniture and product designs. Lai's aim 'to create unique and functional works that make people smile' is embodied in one of his latest pieces, the Saturn table lamp. Made from powder-coated steel with an oak or walnut base, the shallow tray surrounding the bulb — inspired by the rings of the lamp's namesake planet — offers a smart place to store small everyday items.

## Frag × Philippe Bestenheider

Swiss designer Philippe Bestenheider has collaborated with Italian leather and hide furniture producer Frag to produce the Heta armchair, a reworking of the classic Bergère. The high-backed armchair embodies a fresh interpretation of its iconic predecessor, and its clean lines and combination of materials — the structure is solid beechwood complemented by full-grain leather upholstery — result in a bold design that is also an instant classic.
