YELLOW: HAPPINESS AND BETTER COMMUNICATION

A motivating hue that is connected to intelligence, wisdom and creativity. It is considered the most optimistic for its link to the sun's colour and the natural energy that emanates from this shining star. It can be playful in small doses, but it can also be overwhelming or anxiety-inducing in large amounts.

ORANGE: EXCITEMENT AND ABUNDANCE

A vivid shade that is known for its stimulating effects. It is said to trigger feelings like enthusiasm and enterprising actions. Its revitalising nature is also believed to raise the amount of oxygen that goes to your brain, making you livelier and ready to move. On the other hand, it can also increase your appetite.
